

VEDANT SHEKHAR

Rajkot, Gujarat, India | +91-9157827489 | vedantshekh1@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Computer Engineering undergraduate (CGPA 9.47/10, Top 1%) specializing in **Artificial Intelligence** at Marwadi University. Hands-on production experience in **Generative AI, Machine Learning, Deep Learning**, and **Transformer architectures**. Strong software engineering foundation in C++ and Python with 500+ DSA problems solved. Published patent holder as a 2nd-year undergraduate.

EDUCATION

B.Tech in Computer Engineering — Artificial Intelligence *Expected May 2027*

Marwadi University, Rajkot, India | CGPA: **9.47 / 10 (Top 1% of cohort)**

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript, Java, Swift, SQL

AI / ML Frameworks: TensorFlow, Keras, PyTorch, LangChain, Hugging Face Transformers, Gemini API, OpenAI API

GenAI & RAG: Retrieval-Augmented Generation (RAG), Vector Databases (Pinecone), Prompt Engineering, Embeddings, LLM Fine-tuning

Backend & Tools: Node.js, REST APIs, Firebase (FCM), Git, GitHub, Linux, Streamlit, VS Code API

Mobile Development: Kotlin, Jetpack Compose, Wear OS, Android SDK

Security: JWT, AES-256, SSL Certificate Pinning, OWASP Mobile Top 10

CS Fundamentals: Data Structures & Algorithms (DSA), OOP, DBMS, System Design, Computer Vision

EXPERIENCE

Software Engineer Intern | Uest EdTech Pvt. Ltd., Rajkot

May 2026 – Present

- **Designed and built a Wear OS smartwatch module** (Kotlin, Jetpack Compose) for a School ERP platform serving **3,000+ students across 12 schools**, enabling real-time access to student/staff directories, admissions, fee records, and leave approvals.
- Developed and integrated 10+ backend REST APIs within the first month for watch-specific workflows including student/staff listing, leave approval, admissions, and ERP dashboard metrics; restructured database schemas to align with production ERP data.
- Implemented **Firestore Cloud Messaging (FCM)** for real-time push notifications — device token registration, backend sync, and instant alerts for admissions, leave requests, and school events.
- Enhanced Wear OS UX using Jetpack Compose components, Swipe-to-Go-Back navigation, and dark theme optimization; reduced wrist-based ERP interaction time and improved overall responsiveness.

Technical Lead | Marwadi University AI/ML Club, Rajkot

Jan 2024 – Present

- Led an 8-member team delivering AI/ML projects at university hackathons; organized hands-on GenAI workshops covering LangChain and Hugging Face, attended by 100+ students.
- Mentored junior members on NLP, computer vision, and LLM-based project architectures; drove adoption of best practices in model training and deployment.

Competitive Programmer | LeetCode / STRIKE Platform

2023 – Present

- Solved 500+ DSA problems in C++ across arrays, trees, graphs, dynamic programming, and greedy algorithms; consistently ranked in the top percentile on contest leaderboards.

PROJECTS

ASHA AI Assistant — GenAI Healthcare Platform for Rural India | *Node.js, Gemini API, RAG, Pinecone* | [GitHub](#)

- Built a 16-feature AI assistant for rural ASHA healthcare workers featuring real-time triage scoring (0–100), a RAG pipeline using Google text-embedding-004 with cosine similarity retrieval over a Pinecone vector store.
- Integrated Gemini Vision for image-based diagnosis, bilingual Hindi/English voice support, and live RSS-based disease outbreak trend detection.

Plant Disease Detection System | *Python, TensorFlow, Keras, InceptionV3, Streamlit*

- Trained CNN and InceptionV3 models on 56,000+ images across 38 crop disease classes; achieved 91.5% test accuracy via transfer learning and data augmentation.
- Deployed Streamlit web app with Class Activation Maps (CAM) for explainable AI, enabling farmers to identify and act on crop diseases with visual explanations.

CodeCritic — GenAI-Powered VS Code Extension | *JavaScript, VS Code API, Gemini API* | [GitHub](#)

- Developed a GenAI VS Code extension for multi-file static analysis and automated code refactoring; implemented context-aware prompt engineering to deliver actionable, real-time in-editor diagnostics.

ACHIEVEMENTS & PATENT

Patent Filed — AI-Powered Nutritional Prep Unit (Ref. No. MU.1956)

- Filed patent for an IoT-based automated meal preparation device combining embedded sensors, computer vision (AWS Rekognition), and AI-driven nutritional analysis — a rare achievement as a 2nd-year undergraduate.

Academic Excellence: CGPA 9.47/10 — consistently top 1% of B.Tech cohort across all semesters.
